## COMPARATIVE THERMOMETER READINGS

NOTE—Visitors planning trips such as fishing, camping, canoeing, should bring along articles of medium and heavier weight wear in addition to summer apparel as evenings are cool. Insect pests and bush travel go together and outdoor vacationers should carry a supply of insect repellent as a precaution and if possible bring clothing through which insects cannot readily bite. Black flies and mosquitoes are most bothersome during late spring and early summer. Circumstances however, vary according to local water and weather conditions. During winter months all main highways are well plowed and usually bare.

Weather conditions vary somewhat in different sections of Canada but the above tabulation outlines in general the normal conditions during the four seasons.
